Course Learning Outcomes	
1	Ability to communicate effectively in written/spoken Turkish.
2	To cause students to gain skills of the documental and oral expressions; proper usage of fundamental syntax; self confidence and creativity for the documental and oral expressions
3	Comprehend the necessity of life-long learning and gain the ability of self-learning
4	Ability to adapt to changing conditions
5	Ability to possess professional and ethical responsibilities, taking charge and fulfilling the requirements.
6	Ability to create algorithmic solutions to inspect, improve and enhance existing systems by means of analytical approaches
7	Ability to function as a member of a team.

Contribution of the Course to Program Qualifications		Contribution Level
01	The student will have the ability to apply analytical approach, mathematics and science knowledge in software and engineering issues.	2
02	The student will have the ability to identify, define, formulate and solve a problem in software and computer systems.	3
03	The student will have gains scientific research skills in software and engineering problems, has the ability to design a system, part or process.	0
04	The student will have the ability to use the design capability, techniques and tools required for engineering applications.	0
05	The student will have the ability to design, implement and interpret experimental work and software projects by analyzing the results.	2
06	The student will have the ability to work between disciplines and teamwork.	0
07	The student will have the ability to work in international environments and adapt to different cultures.	5
08	The student will have verbal and written communication skills in Turkish and English.	0
09	The student will have the awareness of the necessity of lifelong learning and the ability to realize it.	1
10	The student will gain knowledge of legal issues with the awareness of professional and ethical responsibility.	3
11	The student will have managerial skills (leadership, organization, time and risk management, quality awareness, efficiency, etc.).	0
12	The student will have the ability to participate in social activities, to acquire regular sports habits and to use time in the best way.	1
13	The student will have the ability to find unusual ways and produce projects.	0
14	The student will have professional self-confidence, being an entrepreneur and taking initiative.	1
15	It is sensitive about the problems of the age and looks after the national interests.	0

ECTS WORKLOAD			
	Number	Duration (hours)	Number*Duration
Face to face education	14	2	28
Out-of-class study time (pre-study, reinforcement)	10	1	10
Homeworks	1	2	2
Presentation / Seminar preparation	1	2	2
Quizzes	1	1	1
Preparation for midterm exams	1	1	1
midterm exams	1	1	1
Project (Semester assignment)	0	0	0
Lab	0	0	0
field work	0	0	0

Preparation for the final exam	1	1	1
Semester final exam	1	1	1
Research	1	3	3
<b>TOTAL WORKLOAD</b>			<b>50</b>
